Description

ANCESTRA

ANCESTRA is a Species-Specific prebiotic – probiotic – postbiotic just for dogs!

Pet parents, more than ever, are focused on improving their pet's health. Dogs have a delicate balance of bacteria in their digestive system that can be disrupted by stress, diet, medications or illness. A diverse, balanced and healthy microbiome comes from having a range of Species Appropriate fresh foods in the diet but sometimes supplementation is beneficial.

ANCESTRA contains all three “biotics” to potentially alleviate digestive issues in dogs, such as diarrhea, constipation, leaky gut and irritable bowel syndrome. It can also help strengthen the immune system, making dogs more resistant to infections and diseases. Additionally, **ANCESTRA** may help manage allergies through regulation of the immune response, reducing inflammation.

The probiotic strains in **ANCESTRA** have been isolated from freshly voided

faeces of healthy animal donors. This unique combination of microbes has undergone assessment in vitro and in vivo which shows that this species-specific probiotic can colonize in the gut.

ANCESTRA offers palatability, safety and the ability to survive gastric digestion, locating in the large intestine (adhere and colonize) and proliferate.

ANCESTRA can influence microbiome microbial populations and increase the production of SCFA (short-chain fatty acids). It offers defence against pathogenic bacteria, may reduce infection and inflammation, and increase nutrient absorption.

Patented microencapsulation improves survivability in the intestinal tract.

ANCESTRA Probiotics are produced in an FDA registered facility to meet the highest standards and are recognized by Health Canada under the Veterinary Health Products program.

PREBIOTICS

Non-GMO FOS (Fructo-oligosaccharide)

MOS (Mannan-oligosaccharide)

Organic Pumpkin Powder

PROBIOTIC STRAINS

Lactobacillus casei K9-1

Lactobacillus fermentum K9-2

Lactobacillus brevis WF-18

Enterococcus faecium PCEF02

Saccharomyces boulardii

POSTBIOTIC

EpiCor (Postbiotic)

Synergist (Postbiotic)

ANIMAL WEIGHT/ DAILY SERVING AMOUNT

<10 kg (<22 lbs) 1/2 tsp

10-20 kg (22-44 lbs) 1 tsp

21-40 kg (45-89 lbs) 1 1/2 tsp

For optimal efficacy, refrigerate the sealed package at 2-8°C.
