#### Whole Animal Duck Patties

Packaging

**4 lb Bag** 8 - 1/2 lb patties/bag

**32 lb Case** 8 - 4lb bags/case

**25 lb Bulk Box** 50 patties loose per box

### Description

Finely ground whole duck carcass. Whole duck patties contain the entire bird except the head, feet, feathers and intestines. All the bones are grindable so bone content in duck is higher than patties made from larger animals (only a small percentage of bones in larger animals like goat, lamb, bison and beef are grindable). Organs make up approximately 8% of the patty - this includes lungs, liver, heart and kidneys. On average over all our proteins, patties are composed of 66% muscle meat, 7% bone, 10% organs, 7% blood and 10% fat. Other than the vegetables and fruit in our dinners, we DO NOT add anything to our foods. You may supplement as needed. Please visit our website for healthcare and supplement products.

Like other meats, duck is an excellent source of high-quality protein containing a well-balanced array of amino acids. Duck also contains generous amounts of iron, phosphorus, zinc, copper, selenium, and lesser amounts of the minerals potassium, magnesium, vitamin E, A, C and folic acid. Duck is rich in fatty acids.

It is an excellent food for performance or highly active dogs or as a novel protein source for allergic pets. For pets that require a lower-fat diet, duck can still be fed, although less often or in smaller portions per meal is recommended.
