

Pixies Beef Diet

Price: \$0.00 CAD

Short Description

Whole Animal Beef Patties

Only sold in stores.

2 lb Bag 16 - 2oz patties/bag

Description

Our pasture-raised beef is lower in polyunsaturated omega-6 fatty acids and saturated fats than feedlot beef. With an average of 9.5% fat, our beef is lean and is a very valuable food for any carnivore. It is a rich source of iron and therefore a good food for building blood. Beef is a popular rotational food for those animals that do not have an intolerance to it.

Beef patties contain the whole animal except the heads, hides, bladder and large intestine (manure), hooves, horns (if any). We do not use non-edible bones as these would not be consumed in nature due to their density. Organs make up approximately 8 to 10 % of the patties - this includes lungs, liver, heart, kidneys, and the tongue. The omasum from beef is saved for our green tripe patties. On average over all our proteins, patties are composed of 66% muscle meat, 7% bone, 10% organs, 7% blood, and 10% fat. We DO NOT add anything to our foods. You may supplement as needed. Please visit our healthcare and supplement pages.
