

Pixies Turkey Diet

Price: \$0.00 CAD

Short Description

Whole Animal Turkey Patties

Only sold in stores.

2 lb Bag 16 - 2oz patties/bag

Description

Turkey is high in protein and lower in fat comparing to our other diets at average of 9%. It provides a rich source of iron, zinc, phosphorus, potassium and B vitamins. In terms of minerals, turkey is richest in selenium. Copper, and magnesium are also found in noteworthy amounts. The taurine in dark meat from turkey is very beneficial for cats.

Contains finely ground whole turkey carcass. Whole turkey patties contain the entire bird except the head, feet, feathers and intestines. All the bones are grindable so bone content in turkey is higher than patties made from larger animals (only a small percentage of bones in larger animals like goat, lamb, bison and beef are grindable). Organs make up approximately 8% of the patty - this includes lungs, liver, heart and kidneys. On average over all our proteins, patties are composed of 66% muscle meat, 7% bone, 10% organs, 7% blood and 10% fat. We DO NOT add anything to our foods. You may supplement as needed. Please visit our healthcare and supplement product pages.
